YASH-MV | yash-raj-b8798a285 | yashraj64004@gmail.com | +91 6202728761
Kolkata, India

SUMMARY

B.Tech student (2027 graduate) with strong analytical and problem-solving skills, supported by hands-on experience in Java, Python, SQL, data analysis, and machine learning. Experienced in developing data-driven solutions, analyzing complex datasets, and translating insights into actionable outcomes using Pandas, Scikit-learn, Streamlit, and Plotly. Eager to apply technical, analytical, and problem-solving skills to solve complex business problems and deliver impactful solutions in a consulting environment.

EDUCATION

- **Techno Main Salt Lake, Kolkata** 2023-2027
B.Tech in CSE (AI & ML)
GPA: 8.47
- **SATYAM INTERNATIONAL, Patna** 2023
Class 12th
Percentage: 86.00
- **D.A.V. Public School, WALMI, Patna** 2021
Class 10th
Percentage: 84.83

TECHNICAL SKILLS

Programming	Java, Python
Data Science	Machine Learning, Statistics, EDA, Data Visualization, SQL
Core Subjects	OOP, DBMS, OS
Web Dev	Spring Boot, REST APIs, MySQL, React, Git, GitHub, Jupyter,
Platforms	Postman, Linux/Unix
DSA	350+ problems solved (330+ LeetCode, 20+ Codeforces) utilizing Java.

PROJECTS

RecruitIQ — HR Analytics & Attrition Prediction [|GitHub](#)

- Developed an interactive **HR Analytics dashboard** using Python, Streamlit, and Plotly, performing comprehensive **EDA** and **feature engineering** to visualize workforce trends across multiple demographic filters.
- Implemented a **Random Forest ML model** to predict employee **attrition**, integrating it with rule-based logic to **automate promotion and retrenchment** rate calculations for data-driven HR decision-making.
- Engineered a multi-page, filter-driven interface featuring drill-down analysis capabilities and deployed the final application on **Hugging Face Spaces** for seamless cloud-based accessibility.

Dsa-Analyser — AI-Driven DSA Optimization Platform [|GitHub](#)

- Engineered a Full-Stack platform utilizing the **Google Gemini Pro API** to provide automated Static Code Analysis and Time/Space Complexity feedback, establishing a robust foundation for intelligent code evaluation.
- Architected a **Spring Boot RESTful API** integrated with **JWT Authentication** and **MySQL**, ensuring secure, stateless session management and persistent tracking of user problem-solving histories.
- Synthesized an automated feedback loop that mimics **real-world interviews** by delivering structured efficiency scores and targeted **refactoring suggestions** to bridge the gap between working code and optimal solutions.

CERTIFICATIONS

Machine Learning with Python — IBM (Cognitive Class)

Hands-on Machine Learning with Python covering core ML algorithms, by IBM.

[Link](#)

Data Analytics Job Simulation— Deloitte, June 2025

Completed practical tasks in data analysis and forensic technology.
